

Curriculum Vitae

Name: Francesco Farfàn
Address: Via Ovada 3, Milan
Number: +39 3292218699
Email: frankfarfan96@gmail.com
Sex: Male Date of Birth: 04/05/1996 Nationality: Italian

Professional Profile

I graduated in 2019 as an Electronic Expert where I met the world of programming with C++ and PLC language (to program Arduino circuits or automatic systems). After that I attended a two-year ITS web development course as Fullstack Developer (2020//22). After attending it for a year and a half I discovered that the Frontend side was my passion so from the first months of 2022 I started my journey as self-taught, focusing on Frontend technologies from the basics to deepening and improving my skills as a Frontend developer.

Digital skills

During the fullstack course I saw a lot of web technologies for the frontend, backend and database. But then during my career as self-taught I focused on those of the frontend side.
Technologies : HTML, CSS, JS, Figma, React, React-Router, Redux, Mysql, C++, Java

Professional Experience

Internship as Fullstack developer at IT Cube

During my two-year career, I did a 1 month internship with a software house, where I was part of a backend team.

Education and Training

2019 Baccalaureate - Electronic Expert
Institute Giorgi, Milan
2020/22 Fullstack developer
ITS Tech Talent Factory
